

Containers – Rear and Front End Loaders

Clear thinking, effective solutions for all dry wastes.

Since no two business customers are the same, Viridor maintains a comprehensive inventory of containers in a range of sizes. This means that we can provide the most suitable container for the type of waste and volume every time.

Heavy-duty compaction is available on rear and front end loader vehicles, which are ideally suited for industrial and commercial waste producers and for light compactable wastes. Flexible servicing schedules allow containers to be permanently on site for your convenience.
