

Viridor

**Giving glass
new life.**

Glass recycling, never decreasing quality.

Glass is infinitely recyclable without having any reduction in quality, which saves raw materials, reduces energy, cuts CO₂ emissions and reduces the amount of material going to landfill.

At Viridor, we've invested in the latest glass recycling technologies, allowing for a wider range of glass products to be recycled. This makes us super-efficient, which means we can say "yes" to your glass recycling needs.

Recycled glass can be used to make new bottles and containers, or can be used in the construction industry, replacing virgin materials. Yet, with all this investment, and a clear demand for quality recycled glass for remanufacturing, too much glass still ends up in general waste bins.

What's in it for you?

As well as the feel-good factor of knowing your organisation is playing its part in reducing environmental impact, recycling also helps you:

- Drive down costs and hassle with a single waste management provider
- Meet or exceed your sustainability targets
- Enhance your green credentials: customers and prospects are looking to work with organisations who are ethical and sustainable
- Peace of mind: by working with a compliant, trustworthy provider
- Reduce the size and weight of your general waste bin by diverting glass into recycling containers
- Generate revenue: by partnering with Viridor you could also be entitled to a rebate, turning the waste at the bottom of the bin, into ££s on your bottom line

Award-winning infrastructure

We have the capability and facilities to sort a wide variety of waste glass products into various colour streams, and are proud to run glass recycling sites, where all output is a product ready for remanufacturing.

We are constantly looking at ways to increase recycling rates amongst our customers, and we invest heavily in the right process and equipment to make that happen.

Our own large fleet offers a flexible collection service, with our friendly and helpful drivers always ready to assist.

A trusted advisor

We offer our customers detailed analysis and reporting, with compliance being key. All our products are fully tracked and compliant, ensuring you are never at risk of breaching environmental regulations.

Partner with Viridor and you partner with a true expert in recycling. If required, we can make you experts too. We can offer training and educational resources to help your organisation make the most out of our service.
