

Viridor

**Giving paper and
cardboard new life.**

Our industry has changed. Seeing paper as 'waste' is a thing of the past.

The world is using resources at an unsustainable rate, and has used as much in the past 50 years as in all previous history.

Paper recycling is growing in popularity, not simply because more paper is being used, but because the way we collect and grade paper has become much more sophisticated, efficient and effective.

This means far less CO₂ is generated and less energy used when making new paper from recycled stock than when using virgin pulp.

Viridor has an enviable reputation in the paper recycling industry, and we are a leading recycler of all types of paper and cardboard. We collect from printers, direct mail houses, newsprint factories and offices. 100% of the paper we handle in this way is successfully recycled.

What's in it for you?

As well as the feel-good factor of knowing your organisation is playing its part in reducing environmental impact, recycling also helps you:

- Drive down costs and hassle with a single waste management provider
- Meet or exceed your sustainability targets
- Enhance your green credentials: customers and prospects are looking to work with organisations who are ethical and sustainable
- Peace of mind: by working with a compliant, trustworthy provider
- Generate revenue: by partnering with Viridor you could also be entitled to a rebate, turning the waste at the bottom of the bin, into ££s on your bottom line

Award-winning infrastructure

We are constantly looking at ways to increase recycling rates amongst our customers, and we invest heavily in the right process and equipment to make that happen.

Our own large fleet offers a flexible collection service, with our friendly and helpful drivers always ready to assist.

A trusted advisor

Not only can we collect paper from your business, there are a range of ways we can help you recycle more on-site, from providing a baler, up to a full air-blown extraction system.

We offer our customers detailed analysis and reporting, with compliance being key. All our products are fully compliant, ensuring you are never at risk of breaching environmental regulations.

Partner with Viridor and you partner with a true expert in recycling. If required, we can make you experts too. We can offer training and educational resources to help your organisation make the most out of our service.

Accreditations

Each site operates under the highest quality, environmental, energy efficiency, health and safety standards – certified to ISO 9001, ISO 14001, ISO 50001 and OHSAS 18001 respectively.
